NY’S PENSION FUND HAS $13 BILLION INVESTED IN COAL, GAS AND OIL!

It is immoral to invest in fossil fuels that destabilize our climate. Superstorms, droughts and wildfires have already cost billions of dollars and thousands of lives.

NY’s pension fund lost $20,000 per member due to investments in fossil fuels.

Fossil fuels are a bad investment. The rest of the world has committed to transition away from fossil fuels to comply with the Paris climate agreement. The energy sector has performed worse than any other sector in the market over the last five years.

Divestment can help end the suicidal use of fossil fuels.

Divestment helped stop apartheid in South Africa and it can help stop the use of fossil fuels.

TELL COMPTROLLER TOM DINAPOLI: DIVEST NY FROM FOSSIL FUELS NOW

Tweet: #DivestNY @NYSComptroller Call: 518:474-4044

The Governor, NYC Mayor, and NYC Comptroller all support divestment. DiNapoli should too.
